THE RUG COLLECTION 2019

We are really excited to introduce our latest catalogue, showcasing over 750 rugs from 103 ranges.

We are passionate about rugs, and are committed to supporting our customers by developing our Rug Collection. We feel that our new collection has the perfect mix of products that meet the needs of the modern retailer and consumer marketplace.

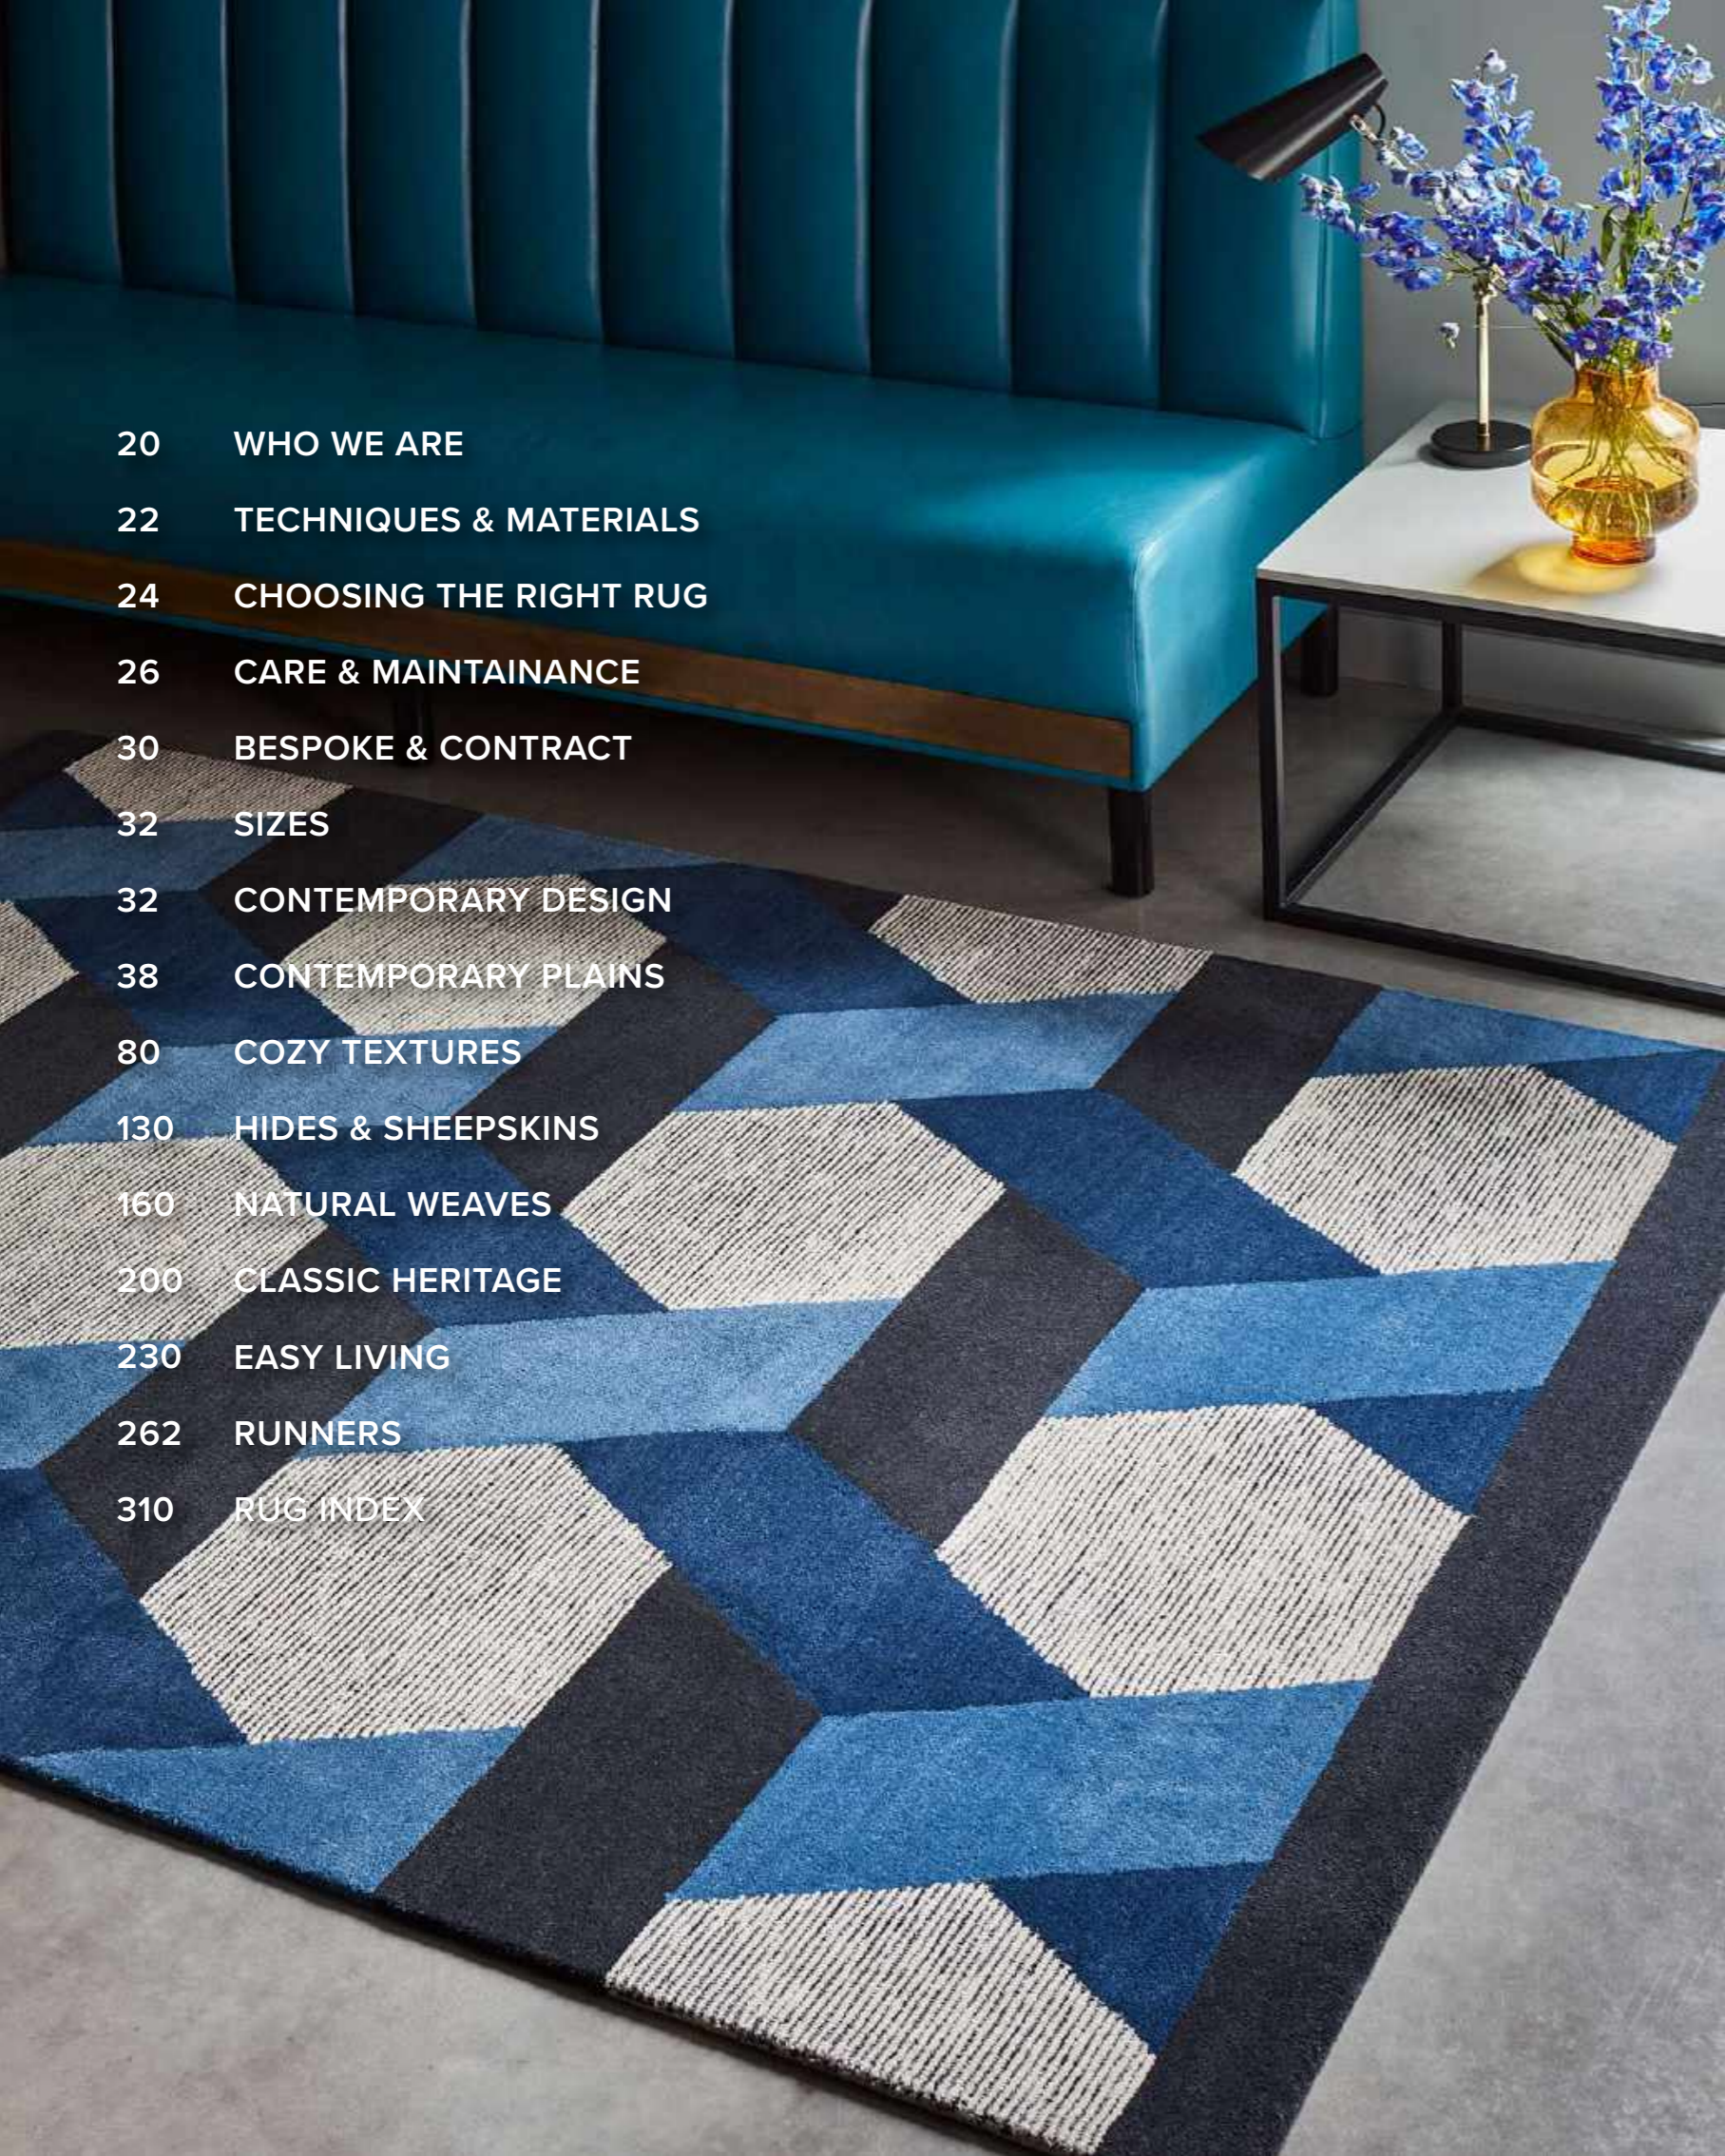

Manufactured by established partners, The Rug Collection has been designed in Britain to appeal to cosmopolitan clientele, offering not only an unrivalled choice but also market leading value.

You might notice some changes from our last catalogue- we have decided to change the way we categorise our ranges.

You will now find 7 collections; from designs and plains to shaggies & flatweaves, with the ranges alphabetically listed within them.

We hope you enjoy using this catalogue as much as we have enjoyed creating it.

NATURAL WEAVES

Encompassing the natural fibres of jute, sisal and wool the diversity of weave, texture and structure can be discovered in this collection. Kelims have ancient tribal origins which we have embraced whilst also creating a range of exciting modern options.

Ideal for casual or ethic design schemes. Jute, known as the golden fibre shows its versatility in chunky weaves, knotted plains and decorative circles. A practical and durable addition for home floors

CARE & MAINTAINANCE

YOUR NEW RUG

A new rug is one of the easiest ways to freshen the look, colour and style of your home. To make it last it must be properly taken care of, the following tips and information will help prolong the life of your rug.

ODOURS

Odours are caused by dyes, latex and by shipping for long distances in a sealed bag. These odours will dissipate within a few days once the rug is removed from its wrapping.

SHEDDING

All wool rugs will shed fibre. This will subside over time depending on traffic, wear and maintenance. We would expect the shedding to be minimised after 20-25 vacuums.

SPROUTING

Loose fibres or sprouts are a normal part of the wearing in process with any hand made rug. These rising fibres should be snipped off with a small pair of scissors. Do not pull these yarns as this can cause a deterioration of the backing.

FADING AND WEAR

If exposed to direct sunlight there is a good chance that your rug will fade over time. To even out the effects of the sun and to balance wear we recommend that your rug is turned every couple of months.

MAINTENANCE

VACUUMING

Your rug will last longer and look better if it is vacuumed regularly. This will help prevent dirt on the surface of the rug filtering down into the pile where it can accumulate and cause increased wear.

For routine cleaning we recommend the use of a suction only type vacuum cleaner. Do not use a rotating brush cleaner as this can damage the rug pile surface.

If the rug has overlapped edges refrain from running the cleaner over the edge as this will loosen fibres and cause them to unravel.

SPILLS

For spills the basic rule is to aim to remove as much moisture as you can as quickly as possible. Blot up excess spills with a clean white cloth or paper towel, working from the outer edge in. Never rub a spill as this can spread the stain and damage the pile.

Should stains prove stubborn and difficult to remove we recommend the use of a professional cleaning company (such as Servicemaster who have national offices across the UK).

To avoid the possibility of colour transfer between your rug and the floor surface beneath we strongly advise the use of underlay. This will have the added benefit of reducing the potential for trip hazards by minimising slippage.

Viscose, jute and sisal fibres are particularly susceptible to staining.

Extra care should be taken to avoid spillages of any kind on rugs containing these elements.

Polypropylene pile rugs are hard wearing and have excellent stain resistant properties.

LATEX ALLERGY

Please note that most rugs contain natural latex in their construction.

Handmade rugs

The very essence of handmade rugs is that they are unique; because of this there can be some small variance in yarn shade or design from one rug to the next. All sizes quoted in this catalogue are approximate and actual sizes may vary by +/- 5%.

Colours

The colours of the rugs shown are as accurate as the printing process allows.

Warranty

We offer a limited one year warranty on all our rugs against manufacturing defects when used in a domestic dwelling. If a manufacturing defect is identified upon receipt of the rug, or develops under normal usage conditions, we will repair or replace the damaged rug. Issues caused by normal wear are not considered manufacturing defects. These include but are not limited to the following:

- shedding – this is normal in new rugs
- sprouting – occasional loose yarns is normal, simply trim
- fading – caused by exposure to direct sunlight
- soiling or staining – accidental spills or general soiling are beyond our control
- wet areas – our rugs are not covered for bath or shower rooms where they may become wet. This warranty does not cover tears, burns, cuts, pulls or other damage, general deterioration, staining, loss of colour or appearance caused by abuse or improper maintenance. It does not cover products placed in commercial premises or areas of higher than normal traffic. This warranty is not transferable, proof of purchase will be required.
